As at 30 September 2010, the Group achieved revenue of approximately USD1,021.4 million, representing an increase of 16.2% compared to the same period last year. However, as impacted by an increase in materials costs, gross profit margin decreased to 6.1% from 7.4% in the same period last year. Profit attributable to equity shareholders of the Company was approximately USD6.0 million, representing a decrease of 46.8% compared to the same period last year. However, the Group's business rebounded significantly during the third quarter of 2010, achieving solid improvement in both operational performance and profitability. Among them, turnover rose 2.7% compared to the previous quarter. Gross profit margin also improved to 7.1% from 5.4% in the previous quarter.

The significant rebound in turnover and profitability during the period was attributable to (1) gradual recoveries in external markets and a steady improvement in the price of chicken meat; (2) continued growth in our processed food business. Our processed food business achieved impressive growth during the period thanks to an optimized product mix, diverse sales channels and outperformance by the brand business. Turnover and gross profit of this segment for the nine months ended 30 September 2010 increased by 49% and 35% from the same period of last year to approximately USD95.4 million and USD12.2 million respectively. To address consumers' concern about food safety, the Group has launched a product tracing system for its "Sisters' Kitchen" products that allows customers to check for details of the products they have purchased. This initiative has been met with good response from consumers since its launch and has boosted both our brand reputation and the popularity of our products. Our efforts to differentiate our products have enhanced our competitive edge as our sales network continued to expand, which in turn has provided support to our financial performance.

In 2010, the increase in the price of raw materials such as corn and soybean meal and labour costs has worsened the operating environment. However, with the steady improvement in the price of chicken meat and further strengthening of the spending power in the mainland market, we are confident that the market will bring with it new development opportunities. We will continue to increase the production capacity of processed foods and feeds and keep a tight lid on costs while making sure to strengthen internal controls to enhance our business performance. At the same time, we will take steps aimed at strengthening and expanding our food processing business.

The Group's balance sheet remains solid while our cash holdings are at a healthy level. Net assets increased to approximately USD261.3 million as at 30 September 2010 from approximately USD258.1 million as at 31 December 2009. As at 30 September 2010, the Group had a net cash position (cash and cash equivalents minus interest-bearing borrowings) of approximately USD1.7 million with a healthy current ratio of 1.4 times and gearing ratio of 20.3%.
