In view of the deteriorating economic environment and declining market sentiment brought about by the unprecedented credit crisis in the second half of 2008, the Group has adopted a tightened risk management policy as well as stringent cost control measures. As a result, the Group experienced a solid rebound in terms of operational performance and profitability in first quarter of 2009. During the period, gross profit achieved a growth of 54.9% quarter-on-quarter, while gross profit margin increased by 3.6% points to 8.3% in the quarter from the quarter ended 31 December 2008. On account of such improvements, the Group managed to turn around its financial results into the projected track in the quarter compared that of the fourth quarter of 2008.

However, in comparison with the same period of last year, the Group recorded turnover of USD272,912 thousand (equivalent to about HKD2,115,068 thousand) for the three months ended 31 March 2009, representing a year-on-year decrease of 7.5%. Gross profit and profit attributable to equity shareholders were USD22,519 thousand (equivalent to about HKD174,522 thousand) and USD3,368 thousand (equivalent to about HKD26,102 thousand) respectively. Gross profit margin was maintained at a healthy level at 8.3% in first quarter of 2009.

The decease in financial performance was attributable to (1) a comparatively higher base in the first quarter of 2008 which recorded exceptionally strong performance, (2) the exchange gain recognized due to appreciation of Renminbi in the first quarter of 2008, (3) strong surges in the prices of chickens seen in the beginning of last year has come down and (4) significant declines in the fair value of agricultural products on initial recognition.

The Group's balance sheet remains solid and its cash holdings are at a healthy level. Net assets increased by approximately USD4,710 thousand (equivalent to about HKD36,503 thousand) from approximately USD244,256 thousand (equivalent to about HKD1,892,984 thousand) as at 31 December 2008 to

approximately USD248,966 thousand (equivalent to about HKD1,929,487 thousand) as at 31 March 2009. As at 31 March 2009, the Group's cash and cash equivalents stood at 14.4% of total assets, while current ratio and gearing ratio held steady at healthy levels at 1.7 times and 8.5%, respectively.

2009 is a year of challenge. In 2009, the Group will focus on strengthening its competitive edge and consolidate its leadership position in quality chicken meat and livestock feeds production. With the continued increase in income nationally and the stimulus package introduced by the Chinese government to boost consumer spending, we expect the food and consumption market will continue to grow in China. It is well-positioned to capitalize the industry's promising growth prospect in the long run.
