CONSOLIDATED FINANCIAL STATEMENTS AND REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

JUNE 30, 2017 AND 2016

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

PWCR 17000957

To the Board of Directors and Shareholders of Gamania Digital Entertainment Co., Ltd.

We have reviewed the accompanying consolidated balance sheets of Gamania Digital Entertainment Co., Ltd. and its subsidiaries as of June 30, 2017 and 2016, and the related consolidated statements of comprehensive income for the three months and six months then ended, of changes in equity and of cash flows for the six months then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our reviews.

Except as explained in the following paragraph, our reviews were made in accordance with the Generally Accepted Auditing Standards No. 36, "Review of Financial Statements" in the Republic of China. A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards in the Republic of China, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

We did not review the financial statements of insignificant consolidated subsidiaries and investments accounted for using equity method, which statements reflect total assets (including investments accounted for under equity method) of $2,082,066 thousand and $2,159,317 thousand, constituting 27% and 26% of the consolidated total assets, and total liabilities of $414,474 thousand and $451,584 thousand, both constituting 8% of the consolidated total liabilities as of June 30, 2017 and 2016, respectively, and total comprehensive income (loss) of $10,859 thousand, ($72,848) thousand, ($24,024) thousand and ($143,647) thousand, constituting 34%, 114%, (42%) and (2,713%) of the consolidated total comprehensive income (including share of profit (loss) of associates and joint ventures accounted for using equity method) for the three months and six months ended June 30, 2017 and 2016, respectively. These amounts and the information disclosed in Note 13 were based solely on the unreviewed financial statements of these companies as of June 30, 2017 and 2016.

Based on our reviews, except for the effect of such adjustments, if any, as might have been determined to be necessary had the financial statements of insignificant consolidated subsidiaries, investments accounted for using equity method and the information disclosed in Note 13 been reviewed by independent accountants, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with the “Rules Governing the Preparation of Financial Statements by Securities Issuers” and IAS 34, “Interim Financial Reporting” as endorsed by the Financial Supervisory Commission.

The accompanying consolidated financial statements are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles generally accepted in countries and jurisdictions other than the Republic of China. The standards, procedures and practices in the Republic of China governing the audit of such financial statements may differ from those generally accepted in countries and jurisdictions other than the Republic of China. Accordingly, the accompanying consolidated financial statements and report of independent accountants are not intended for use by those who are not informed about the accounting principles or auditing standards generally accepted in the Republic of China, and their applications in practice.

GAMANIA DIGITAL ENTERTAINMENT CO., LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2017 AND 2016
(Expressed in thousands of New Taiwan Dollars, except as otherwise indicated)
(UNAUDITED)

1. HISTORY AND ORGANIZATION

Gamania Digital Entertainment Co., Ltd. (the 'Company') was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the 'Group') are primarily engaged in software services of on-line game and sales of related merchandises.

2. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

These consolidated financial statements were reported to the Board of Directors on August 10, 2017.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATION

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ('IFRS') as endorsed by the Financial Supervisory Commission ('FSC')

New standards, interpretations and amendments endorsed by FSC effective from 2017 are as follows:

Improvements to IFRSs 2011-2013	July 1, 2014
Improvements to IFRSs 2012-2014	January 1, 2016

The above standards and interpretations have no significant impact to the Group's financial condition and operating results based on the Group's assessment.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2018 are as follows:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Classification and measurement of share-based payment transactions (amendments to IFRS 2)	January 1, 2018
Applying IFRS 9, 'Financial instruments' with IFRS 4, 'Insurance contracts' (amendments to IFRS 4)	January 1, 2018
IFRS 9, 'Financial instruments'	January 1, 2018
IFRS 15, 'Revenue from contracts with customers'	January 1, 2018

Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 1, 'First-time adoption of International Financial Reporting Standards'	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 12, 'Disclosure of interests in other entities'	January 1, 2017
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IAS 28, 'Investments in associates and joint ventures'	January 1, 2018

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment. The quantitative impact will be disclosed when the assessment is complete.

A. IFRS 9, 'Financial instruments'

Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial asset at fair value through profit or loss, financial asset measured at fair value through other comprehensive income or financial asset measured at amortised cost. Equity instruments would be classified as financial asset at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument that is not held for trading.

B. IFRS 15, ‘Revenue from contracts with customers’

IFRS 15, ‘Revenue from contracts with customers’ replaces IAS 11, ‘Construction Contracts’, IAS 18, ‘Revenue’ and relevant interpretations. According to IFRS 15, revenue is recognised when a customer obtains control of promised goods or services. A customer obtains control of goods or services when a customer has the ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset.

The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps:

Step 1: Identify contracts with customer

Step 2: Identify separate performance obligations in the contract(s)

Step 3: Determine the transaction price

Step 4: Allocate the transaction price

Step 5: Recognise revenue when the performance obligation is satisfied

Further, IFRS 15 includes a set of comprehensive disclosure requirements that requires an entity to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.

C. Amendments to IFRS 15, ‘Clarifications to IFRS 15 Revenue from Contracts with Customers’

The amendments clarify how to identify a performance obligation (the promise to transfer a good or a service to a customer) in a contract; determine whether a company is a principal (the provider of a good or service) or an agent (responsible for arranging for the good or service to be provided); and determine whether the revenue from granting a licence should be recognised at a point in time or over time. In addition to the clarifications, the amendments include two additional reliefs to reduce cost and complexity for a company when it first applies the new Standard.

D. Amendments to IAS 12, ‘Recognition of deferred tax assets for unrealised losses’

These amendments clarify the recognition of deferred tax assets for unrealised losses related to debt instruments measured at fair value, and they clarify several of the general principles underlying the accounting for deferred tax assets. The amendments clarify that a deductible temporary difference exists whenever an asset is measured at fair value and that fair value is below the asset’s tax base. When an entity assesses whether taxable profits will be available against which it can utilise a deductible temporary difference, it considers a deductible temporary difference in combination with all of its other deductible temporary differences unless there are tax law restrictions, and the tax deduction resulting from temporary differences is excluded from estimated future taxable profits.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS as endorsed by the FSC effective from 2017 are as follows:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Sale or contribution of assets between an investor and its associate or joint venture (amendments to IFRS 10 and IAS 28)	To be determined by International Accounting Standards Board
IFRS 16, 'Leases'	January 1, 2019
IFRS 17, 'Insurance contracts'	January 1, 2021
IFRIC 23, 'Uncertainty over income tax treatments'	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment. The quantitative impact will be disclosed when the assessment is complete.

IFRS 16, 'Leases'

IFRS 16, 'Leases', replaces IAS 17, 'Leases' and related interpretations and SICs. The standard requires lessees to recognise a 'right-of-use asset' and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

The Group is assessing the potential impact of the new standards, interpretations and amendments above. The impact will be disclosed when the assessment is complete.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Accounting Standards 34, "Interim financial reporting" endorsed by the FSC.

(2) Basis of preparation

A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities at fair value through profit or loss.

(b) Available-for-sale financial assets measured at fair value.

(c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

(4) Foreign currency translation

Items included in the financial statements of each of the Group’s entities are measured using the currency of the primary economic environment in which the entity operates (the ‘functional currency’). The consolidated financial statements are presented in New Taiwan dollars, which is the Company’s functional and the Group’s presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

B. Translation of foreign operations

(a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and

iii. All resulting exchange differences are recognised in other comprehensive income.

(b) When the foreign operation partially disposed of or sold is an associate, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.

(c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, if the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realised within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be paid off within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be paid off within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

A. Financial assets at fair value through profit or loss are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category of held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorised as financial assets held for trading unless they are designated as hedges.

B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using settlement date accounting.

C. Financial assets at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in profit or loss.

(8) Available-for-sale financial assets

A. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.

B. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.

C. Available-for-sale financial assets are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income.

(9) Accounts receivable

Accounts receivable are receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognised at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. However, for short-term accounts receivable which are non-interest bearing, as the effect of discounting is insignificant, they are measured subsequently at initial invoice amount.

(10) Impairment of financial assets

A. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

B. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:

(a) Significant financial difficulty of the issuer or debtor;

(b) A breach of contract, such as a default or delinquency in interest or principal payments;

(c) The Group, for economic or legal reasons relating to the borrower's financial difficulty, granted the borrower a concession that a lender would not otherwise consider;

(d) It becomes probable that the borrower will enter bankruptcy or other financial reorganisation;

(e) The disappearance of an active market for that financial asset because of financial difficulties;

(f) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;

(g) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered; or

(h) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

C. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(a) Financial assets measured at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(b) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from 'other comprehensive income' to 'profit or loss'. If, in a subsequent period, the fair value of an investment in a debt instrument increase, and the increase can be related ovjectively to an event occurring after the impairment loss was recognised, then such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(11) <u>Derecognition of financial assets</u>

The Group derecognises a financial asset when one of the following conditions is met:

A. The contractual rights to receive cash flows from the financial asset expire.

B. The contractual rights to receive cash flows from the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.

C. The contractual rights to receive cash flows from the financial asset have been transferred and the Group has not retained control of the financial asset.

(12) Inventories

Inventories are stated at the lower of cost and net realisable value. The original cost is the cost to obtain the assets. Cost is determined using the weighted-average method. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the applicable variable selling expenses.

(13) Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction rather than through continuing use, and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

(14) Investments accounted for under the equity method / associates

A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.

B. The Group’s share of its associates’ post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group’s share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or/constructive obligations or made payments on behalf of the associate.

C. When changes in an associate’s equity are not recognised in profit or loss or other comprehensive income of the associate and such changes do not affect the Group’s ownership percentage of the associate, the Group recognises change in ownership interests in the associate in ‘capital surplus’ in proportion to its ownership.

D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group’s interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group’s ownership percentage of the associate but maintains significant influence on the associate, then ‘capital surplus’ and ‘investments accounted for under the equity method’ shall be adjusted for the increase or decrease of its share of equity interest.

F. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, then the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, then the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(15) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost.

B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each part of an item of property, plant and equipment has a cost that is significant in relation to the total, the cost of the item must be depreciated separately.

D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Buildings	3～55 years
Machinery and equipment	2～6 years
Transportation equipment	5 years
Office equipment	2～4 years
Leasehold assets	2～6 years
Other equipment	2～4 years

(16) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life of 4 ~ 55 years.

(17) Intangible assets

A. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

B. Software

Costs of software are stated at cost and amortised under the straight-line basis over the estimated useful lives.

C. Licences

Upfront licence fees for operating online game software are capitalised and amortised based on the period of the contract or deducted based on actual units of play.

D. Other intangible assets

Other intangible assets, which are trademarks, outsourcing for mobile games' production and unamortised expenses, have definite useful lives and are amortised on a straight-line basis over their estimated useful lives.

(18) Lease

Lease income from an operating lease (net of any incentives given to the lessee) or payments made under an operating lease (net of any incentives received from the lessor) is recognised in profit or loss on a straight-line basis over the lease term.

(19) Impairment of non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

B. The recoverable amounts of goodwill and intangible assets that have not yet been available for use shall be evaluated periodically. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.

C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(20) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(21) Notes and accounts payable

Notes and accounts payable are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. They are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. However, short-term accounts payable which are non-interest bearing are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(22) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(23) Financial liabilities and equity instruments – Bonds payable

A. Ordinary corporate bonds issued by the Group are initially recognised at fair value, net of transaction costs incurred. Ordinary corporate bonds are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is accounted for as the premium or discount on bonds payable and presented as an addition to or deduction from bonds payable, which is amortised in profit or loss as an adjustment to the 'finance costs' over the period of bond circulation using the effective interest method.

B. Convertible corporate bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable and derivative features embedded in convertible corporate bonds on initial recognition as a financial asset, a financial liability or an equity instrument ('capital surplus - stock warrants') in accordance with the substance of the contractual arrangement and the definitions of a financial asset, a financial liability and an equity instrument. Convertible corporate bonds are accounted for as follows:

(a) Call options and put options embedded in convertible corporate bonds are recognised initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.

(b) Bonds payable of convertible corporate bonds is initially recognised at fair value and subsequently stated at amortised cost. Any difference between the proceeds and the redemption value is accounted for as the premium or discount on bonds payable and presented as an addition to or deduction from bonds payable, which is amortised in profit or loss as an adjustment to the 'finance costs' over the period of bond circulation using the effective interest method.

(c) Conversion options embedded in convertible corporate bonds issued by the Group, which meet the definition of an equity instrument, are initially recognised in 'capital surplus—stock warrants' at the residual amount of total issue price less amounts of 'financial assets or financial liabilities at fair value through profit or loss' and 'bonds payable—net' as stated above. Conversion options are not subsequently remeasured.

(d) Any transaction costs directly attributable to the issuance of convertible corporate bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.

(e) When bondholders exercise conversion options, the liability component of the bonds (including 'bonds payable' and 'financial assets or financial liabilities at fair value through profit or loss') shall be remeasured on the conversion date. The book value of common shares issued due to the conversion shall be based on the adjusted book value of the abovementioned liability component plus the book value of capital surplus - stock warrants.

(24) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from either the Group's decision to terminate an employee's employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Group recognises expense when it can no longer withdraw an offer of termination benefits or it recognises relating restructuring costs, whichever is earlier. Benefits that are expected to be due more than 12 months after balance sheet date shall be discounted to their present value.

D. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates.

(25) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

(26) Income tax

A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.

B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

C. Deferred tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.

D. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

F. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the tax credits can be utilised.

G. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

(27) <u>Share capital</u>

A. Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

B. Where the Company repurchases the Company's equity share capital that has been issued, the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the Company's equity holders. Where such shares are subsequently reissued, the difference between their book value and any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

(28) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(29) Revenue recognition

A. Sales of goods

(a) The Group operates on-line games, sells prepaid cards for on-line games and the related products. Revenue is measured at the fair value of the consideration received or receivable taking into account sales tax, returns and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods is recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied. Revenue from software and other merchandise is recognised when they are delivered.

(b) The Group is engaged in the sale of on-line game stored-value cards and provision of on-line game services. When the consumers purchase the online game credits, and use the credits to exchange for service for playing the on-line games and receiving virtual items then the consumed credits are deducted from the players' accounts. The Group recognises the collections of payments for game card purchases or value-added by players as 'deferred revenue' within current liabilities, and amortises those amounts as revenue over the period of the services or the estimated delivery period of the virtual items, when they are actually used in the purchases of services or virtual items for online games.

B. Sales of services

Service revenue arise mainly from rendering customer related services and advertising, and is recognised based on mutual agreement over the term of the service contract.

(30) Revenue from government grants

Government grants are recognised at their fair value only when there is reasonable assurance that the Group will comply with any conditions attached to the grants and the grants will be received. Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises expenses for the related costs for which the grants are intended to compensate.

(31) Business combinations

A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.

B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date. The duration of fair value measurement of identifiable assets and assumed liabilities of acquiree may not exceed 1 year from the acquisition date.

(32) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Financial assets-impairment of equity investments

The Group follows the guidance of IAS 39 to determine whether a financial asset-equity investment is impaired. This determination requires significant judgment. In making this judgment, the Group evaluates, among other factors, the duration and extent to which the fair value of an equity investment is less than its cost and the financial health of and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow.

If the decline of the fair value of an individual equity investment below cost was considered significant or prolonged the Group would suffer a loss in its financial statements, being the transfer of the accumulated fair value adjustments recognized in other comprehensive income on the impaired available-for-sale financial assets to profit or loss or being the recognition of the impairment loss on the impaired financial assets measured at cost in profit or loss.

B. Revenue recognition on a net/gross basis

The determination of whether the Group is acting as principal or agent in a transaction is based on an evaluation of the Group's exposure to the significant risks and rewards associated with the sale of goods or the rendering of service in accordance with the business model and substance of the transaction. Where the Group acts as a principal, the amount received or receivable from customer is recognised as revenue on a gross basis. Where the Group acts as an agent, net revenue is recognised representing commissions earned.

The following characteristics of a principal are used as indicators to determine whether the Group shall recognise revenue on a gross basis:

(a) The Group has primary responsibilities for the goods or services it provides;

(b) The Group bears inventory risk;

(c) The Group has the latitude in establishing prices for the goods or services, either directly or indirectly.

(d) The Group bears credit risk of customers.

(2) Critical accounting estimates and assumptions

A. Revenue recognition

The Group recognises the collections of payments for game card purchases or value-added by players as 'deferred revenue' within current liabilities, and amortizes those amounts as revenue over the period of the services or the estimated delivery period of the virtual items, when they are actually used in the purchases of services or virtual items for online games. The Group estimates the deferred amount and delivery period based on operating history and other known factors, and reviews its rationale periodically. As of June 30, 2017, the Group's deferred revenue amounted to

$9,999, shown as 'Other current liabilities'.

B. Impairment assessment of licences

The impairment assessment of licences depends on the Group's subjective judgement. The recoverable amount is determined based on estimated online game revenue arising from expected game points used by players and projected expenditures.

As of June 30, 2017, the Group recognised licences, net of impairment loss, amounting to $221,777.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	June 30, 2017	December 31, 2016	June 30, 2016
Cash on hand	$ 1,530	$ 1,539	$ 1,293
Checking accounts and demand deposits	1,705,383	1,255,592	1,698,224
Cash equivalents - time deposits	204,642	215,002	173,654
	$ 1,911,555	$ 1,472,133	$ 1,873,171

A. The Group deals with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

B. Details of the Group's cash and cash equivalents pledged to others as collateral are provided in Note 8.

(2) Available-for-sale financial assets

Items	June 30, 2017	December 31, 2016	June 30, 2016
Non-current items:			
Listed stocks	$ 368,320	$ 373,308	$ 373,552
Unlisted stock	270,709	255,440	250,012
	639,029	628,748	623,564
Valuation adjustment of available-for-sale financial assets	241,829	197,528	58,766
Accumulated impairment	(358,263)	(358,263)	(9,206)
	$ 522,595	$ 468,013	$ 673,124

A. The Group recognised $22,917, $27,163, $68,345 and $117,139 in other comprehensive income for fair value change for the three months ended June 30, 2017 and 2016 and six months ended June 30, 2017 and 2016, respectively. The Group reclassified ($225), $0, $16,791 and $0 from equity to profit or loss because of (loss) gain on disposal of investments for the three months ended June 30, 2017 and 2016, and six months ended June 30, 2017 and 2016, respectively.

B. There are no available-for-sale financial assets of the Group that are debt instrument investments.

C. As of June 30, 2017, December 31, 2016 and June 30, 2016, no available-for-sale financial assets of the Group were pledged as collateral.

Note 1: In May 2016, the Company did not participate in the capital increase of Chuang Meng Shr Ji Co., Ltd. proportionately to the interest ownership, thus, the share ownership decreased to 19.35%. However, the Company maintains significant influence over Chuang Meng Shr Ji Co., Ltd. as the Company holds one seat in the Board of Directors and participates in making strategic decisions.

Note 2: In May 2017, the Company jointly established Mission Worldwide Group Limited in British Virgin Islands. The Company acquired approximately 51% equity interest and more than half of the total number of directors in the following years. The Company presently has one Director and participates in the determination of policies, therefore, the Company has significant influence to Mission Worldwide Group Limited.

B. For the six months ended June 30, 2017 and 2016, the Group's associates were accounted for using equity method based on their unreviewed financial statements.

C. Information on the Group's significant associate as of June 30, 2017, December 31, 2016 and June 30, 2016 is shown below:

Company name	Principal place of business	Ownership (%) June 30, 2017	December 31, 2016	June 30, 2016	Nature of relationship	Method of measurement
Seedo	Taiwan	38.26%	38.26%	40.00%	(Note)	Equity method

Note: Seedo's main business activities are software services and sales. Seedo was originally 100% owned by the Company. However, to accelerate the transformation of the Group and adjust the investment components, the Company disposed 60% share capital of Seedo and accordingly, Seedo became an associate.

D. The summarised financial information of the associate that is material to the Group is shown below:

A. The Company issued the first domestic secured convertible bonds as approved by the Financial Supervisory Commission, Securities and Futures Bureau, No. 1040024074 on July 2, 2015. The terms are as follows:

(a) Total issuance: $700,000

(b) Coupon rate: 0%

(c) Issuance duration: 3 years (July 15, 2015 to July 15, 2018)

(d) Conversion period: Starting from the date after one month of the issuance to maturity date (August 16, 2015 to July 15, 2018)

(e) Conversion price and adjustment: The conversion price was NT$41.5 (in dollars) per share at issuance. After the issuance, except securities with conversion rights or warrants convertible to ordinary shares, the applicable conversion price was subject to adjustments set out in the indenture.

(f) Redemption

i. The Company may inform creditors within 30 trading days after the issuance and repurchase all the bonds outstanding in cash at the bonds' face value at any time after the following event occurs: the closing price of the Company's common shares is above the then conversion price by 30% for 30 consecutive trading days during the period from the date after one month of the bonds issue to 40 days before the maturity date (August 16, 2015 to June 5, 2018).

ii. The Company may inform creditors any time after the balance sheet date to repurchase all the bonds outstanding in cash at the bonds' face value or repurchase all the bonds at the current conversion price within 1 month after the notice after the following events occur: the outstanding balance of the bonds is less than 10% of total initial issue amount during the period from the date after three months of the bonds issue to 40 days before the maturity date (August 16, 2015 to June 5, 2018).

(g) Put options:

The bondholders have the right to require the Company to redeem any bonds in cash at 101% of the bonds' face value on the date after two years from the issue date (July 15, 2017).

(h) Rights and obligations after conversion:

The rights and obligations of the new shares converted from the bonds are the same as the issued and outstanding common shares.

(i) Under the terms of the bonds, all bonds redeemed (including bonds repurchased from the Taipei Exchange), matured and converted are retired and not to be re-issued; all rights and obligations attached to the bonds are also extinguished.

B. Regarding the issuance of convertible bonds, the equity conversion options amounting to $24,036 were separated from the liability component and were recognised in 'capital surplus - stock warrants' in accordance with IAS 32. The call options and put options embedded in bonds payable were separated from their host contracts and were recognised in 'financial assets or liabilities at fair value through profit or loss' in net amount in accordance with IAS 39 because the economic characteristics and risks of the embedded derivatives were not closely related to those of the host contracts. The effective interest rate of the bonds payable after such separation is 1.57%.

(16) Pensions

A. Defined benefit plan

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by March 31, every year. If the account balance is not enough to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contribution for the deficit by next March.

(b) For the aforementioned pension plan, the Group recognised pension costs of $145, $145, $290 and $291 for the three months ended June 30, 2017 and 2016 and six months ended June 30, 2017 and 2016, respectively.

(c) Expected contributions to the defined benefit pension plan of the Company for the year ending December 31, 2018 are $1,361.

B. Defined contribution plans

(a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the 'New Plan') under the Labor Pension Act (the 'Act'), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The Company's mainland subsidiaries, Gamania Digital Entertainment (Beijing) Co., Ltd., Legion Technology (Shanghai) Co., Ltd. and Jollywiz Digital Business Co., Ltd., have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People's Republic of China (PRC) are based on a certain percentage of employees' monthly salaries and wages. The contribution percentage for the six months ended June 30, 2017 and 2016 were both 20%~22%. Other than the monthly contributions, the Group has no further obligations.

(c) Gamania Digital Entertainment (Japan) Co., Ltd., Gamania Digital Entertainment (H.K.) Co., Ltd., Gash Point (Hong Kong) Company Limited, Gash Point (Japan) Co., Ltd., Gash Point Korea Co., Ltd., Joymobee Entertainment Co., Ltd., Hapod Digital Technology Co., Ltd., Jollywiz International (HK) Co., Ltd., Madsugr Digital Technology (HK) Co., Ltd. and CoCo Digital Technology (HK) Co., Ltd. provide pension reserves annually for their employees in accordance with the local regulations.

(d) The pension costs under the defined contribution pension plans of the Group for the three months ended June 30, 2017 and 2016, and six months ended June 30, 2017 and 2016 were $7,566, $7,011, $14,352 and $14,050, respectively.

(18) Capital surplus

A. Pursuant to the R.O.C. Company Law, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

B. When it is resolved by the shareholders at the shareholders' meeting, legal reserve and whole or part of capital reserve arising from the following items can be used to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit:

(a) Paid-in capital in excess of par value on issuance of common stocks; and

(b) Donations.

(19) Unappropriated retained earnings

A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior year's operating losses, then 10% of the remaining amount shall be set aside as legal reserve. However, it is not subject to the limits if the legal reserve equals the paid-in-capital. Appropriate special reserve in accordance with the operation of the Group and legal regulation, and the remainder along with beginning unappropriated earnings is the accumulated distributable earnings which should be appropriated as proposed by the Board of Directors and resolved by stockholders during their meeting.

B. The Company adopts conservatism principle for its dividend policy and considers profitability, financial structure and future development, and the percentage of cash dividends should not be less than 10%.

C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

D. Special reserve

(a) In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

(b) The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently.

E. On June 16, 2016, the shareholders during their meeting resolved the 2015 appropriation of retained earnings as follows:

The Group's activities expose it to a variety of financial risks, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's risk management program considers the effect of economic environment, competition and market value risk. The Group attains to the best risk position, holds appropriate liquidity position and centers on management of all the market risks. To reach the objective of risk management, the Group's hedged activities are focused on the market value risk and the cash flow risk.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

i. Each of the entities in the Group operates in different countries and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. To manage their foreign exchange risk arising from future commercial transactions and recognised assets and liabilities, the Group set the natural hedging as principle. Foreign exchange risk arises when future commercial transactions, recognised assets or liabilities are denominated in a currency that is not the entity's functional currency.

iii. The Group's businesses involve some non-functional currency operations. The information on assets and liabilities denominated in foreign currencies of each entity in the Group whose values would be materially affected by the exchange rate fluctuations is as follows:

Price risk

The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated balance sheet either as available-for-sale or at fair value through profit or loss. The Group is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.

The Group's investments in equity securities comprise domestic listed and unlisted stocks. The prices of equity securities would change due to the change of the future value of investee companies. However, the Group has set stop-loss amounts for those assets; therefore, no material market risk is expected. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant for the six months ended June 30, 2017 and 2016, other components of equity would have increased/decreased by $4,810 and $6,731, respectively, as a result of gains/losses on equity securities classified as available-for-sale.

Interest rate risk

i. The Group's interest rate risk arises from each borrowing. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rates. Corporate bonds and borrowings issued at fixed rates expose the Group to fair value interest rate risk. The interest rate for short-term borrowings of the Group are mainly floating rate and for long-term borrowings are fixed rate and variables. During the six months ended June 30, 2017 and 2016, the Group's borrowings at variable rate were denominated in NTD and RMB.

ii. At June 30, 2017 and 2016, if interest rates on borrowings had been 1% higher/lower with all other variables held constant, post-tax profit for the six months ended June 30, 2017 and 2016 would have been $102 and $143 lower/higher, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

(b) Credit risk

i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on bookkeeping and administrative department's rating. The utilization of credit limits is regularly monitored. Credit risk arises from cash, cash equivalents and accounts receivable arising from operating activities. For banks and financial institutions, only rated parties with a good credit rating are accepted.

ii. During the six months ended June 30, 2017 and 2016, no credit limits were exceeded during the reporting periods, and management does not expect any significant losses from non-performance by these counterparties.

iii. The details of credit quality of the Group's significant financial assets are provided in Note 6(3).

(c) Liquidity risk

i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by the capital management department. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure that it has sufficient cash to meet operational needs.

ii. The table below is the Group's non-derivative financial liabilities which is presented based on the remaining period at the balance sheet date to the contract maturity date and undiscounted maturity amount based on the maturity date.

(3) Fair value information

A. Details of the fair value of the Group's financial assets and financial liabilities not measured at fair value are provided in Note 12(2) A.

B. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks and open-end fund is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in listed stocks of private placement is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market is included in Level 3.

C. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at June 30, 2017, December 31, 2016 and June 30, 2016 is as follows:

June 30, 2017	Level 1	Level 2	Level 3	Total
Assets				
Recurring fair value measurements				
Available-for-sale financial assets				
Equity securities	$ 18,340	$ -	$ 504,255	$ 522,595

Liabilities				
Recurring fair value measurements				
Financial liabilities at fair value through profit or loss - current				
Embedded derivatives	$ -	$ -	($ 2,870)	($ 2,870)

June 30, 2016	Level 1	Level 2	Level 3	Total
Assets				
Recurring fair value measurements				
Available-for-sale financial assets				
Equity securities	$ 42,607	$ 329,392	$ 301,125	$ 673,124
Liabilities				
Recurring fair value measurements				
Financial liabilities at fair value through profit or loss - current				
Embedded derivatives	$ -	($ 2,800)	$ -	($ 2,800)

D. The methods and assumptions the Group used to measure fair value are as follows:

(a) The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares and emerging shares
Market quoted price	Closing price

(b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.

(c) For highly complex financial instruments, the fair value is measured by using self-developed valuation model based on the valuation method and technique widely used within the same industry. The valuation model is normally applied to derivative financial instruments, debt instruments with embedded derivatives or securitised instruments. Certain inputs used in the valuation model are not observable at market, and the Group must make reasonable estimates based on its assumptions. The effect of unobservable inputs to the valuation of financial instruments is provided in Notes 12(3) I and J.

(d) The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

E. For the six months ended June 30, 2017 and 2016, there was no transfer between Level 1 and Level 2.

F. The following chart is the movement of Level 3 for the six months ended June 30, 2017 and 2016:

	Equity securities	
	2017	2016
At January 1	$ 428,388	$ 225,348
Gains and losses recognised in other comprehensive income	63,068	79,849
Acquired during the period	15,271	21,458
Transfers out from level 3	-	(25,530)
Effects of foreign exchange	(2,472)	-
At June 30	$ 504,255	$ 301,125

	Embedded derivatives	
	2017	2016
At January 1	($ 2,870)	($ 1,400)
Issued in the period	-	-
Gains and losses recognised in profit or loss (Note)	2,870	(1,400)
At June 30	$ -	($ 2,800)

(Note) Shown as other gains and losses.

G. Because the transaction volume of certain emerging shares in market has steadily increased from January 2016, and there is enough observable market information available, the Group has transferred the fair value from Level 3 into Level 1 at the end of month when the event occurred. For the six months ended June 30, 2017, there was no transfer into or out from Level 3.

H. Treasury department is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

I. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at June 30, 2017	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity					
Unlisted shares	$ 504,255	Market comparable companies	Price to book ratio multiple	1.87~3.11 (2.89)	The higher the multiple, the higher the fair value
			Enterprise value to operating income ratio multiple	30.64~32.66 (32.66)	The higher the multiple, the higher the fair value
			Discount for lack of marketability	22%~25% (24.71)	The higher the discount for lack of marketability, the lower the fair value
Embedded derivatives:					
Redemption and put options of convertible bonds	-	The Binominal-Tree approach to convertible bonds pricing	Volatility	28.00% (28.00%)	The higher the multiple, the higher the fair value

	Fair value at December 31, 2016	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity					
Unlisted shares	$ 428,388	Market comparable companies	Price to book ratio multiple	1.78~2.63 (2.54)	The higher the multiple, the higher the fair value
			Enterprise value to operating income ratio multiple	25.96~28.25 (26.59)	The higher the multiple, the higher the fair value
			Discount for lack of marketability	22%~25% (24.7%)	The higher the discount for lack of marketability, the lower the fair value
			Capital value to operating income ratio multiple	2.08 (2.08)	The higher the multiple, the higher the fair value
			Investing in capital value to profit before tax ratio	7.07 (7.07)	The higher the multiple, the higher the fair value
Embedded derivatives:					
Redemption and put options of convertible bonds	(2,870)	The Binominal-Tree approach to convertible bonds pricing	Volatility	32.52% (32.52%)	The higher the multiple, the higher the fair value

	Fair value at June 30, 2016	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity					
Unlisted shares	$ 301,125	Market comparable companies	Price to book ratio multiple	2.48 (2.48)	The higher the multiple, the higher the fair value
			Enterprise value to operating income ratio multiple	52.79 (52.79)	The higher the multiple, the higher the fair value
			Discount for control premium	20% (20%)	The higher the discount for control premium, the lower the fair value
			Discount for lack of marketability	25% (25%)	The higher the discount for lack of marketability, the lower the fair value
Embedded derivatives:					
Redemption and put options of convertible bonds	(2,800)	The Binominal-Tree approach to convertible bonds pricing	Volatility	38.09% (38.09%)	The higher the multiple, the higher the fair value

J. The Group has carefully assessed the valuation models and assumptions used to measure fair value; therefore, the fair value measurement is reasonable. However, use of different valuation models or assumptions may result in different measurement. The following is the effect of profit or loss or of other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used to valuation models have changed:
